I am a Programmer Analyst specialized in developing web and desktop applications. I have experience in designing and implementing efficient solutions using technologies such as Java, C#, TypeScript, Angular, and Spring Boot. My focus is on creating functional and adaptable software, participating in all stages of the development lifecycle, from analysis to implementation. I excel in problem-solving, logical thinking, application design, and effective teamwork in multidisciplinary teams.

Experience

UNJU FI

Programmer Analyst Student
07/2022
